Tacton CPQ Visualization

ACADEMY-TACTONCPQ-204

This course aims to give an overview of Tacton CPQ Visualization. The focus of the course is the creation the visualization logic. The logic controls what 3D assets to show and how the visualization reacts to changes made to the configuration. During the course, participants will set up visualization logic for a provided configuration model using provided assets.

The course consists of a mix of theoretical parts as well as practical hands-on exercises.

TYPICAL STUDENT
CPQ administrators who will be in charge of the Visualization logic.

Asset Creators/3D Modelers, (Product) Modelers and Developers who will work with Tacton CPQ.

PREREQUISITES
