

TCstudio Modeling Performance

ACADEMY-MODELING-PERFORMANCE-101

Do you want to know how the configurator works behind the scenes? How does it find a solution quickly and efficiently? What happens during the interaction with the configurator. This training will give you an overview of how the configurator works. The training also provides you with tips on how to improve model performance.

TYPICAL STUDENT

Any person that has taken one or several Tacton modeling courses and wants to get a deeper understanding of how the configurator works and also what influences the performance of the model.
